Best Website Performance Test Tools in 2023

Google PageSpeed Insights

Best for Checking Google's Web Core Vitals

Google PageSpeed Insights is a free online tool that helps you analyze the performance of your website. The tool provides you with actionable recommendations on how to improve the speed of your website. Google PageSpeed Insights is available for both mobile and desktop versions of your website.

GTmetrix

Best for Performance monitoring from different devices and browsers

GTmetrix was developed by Carbon60 as a tool for customers to easily test the performance of their webpages. GTmetrix is a useful tool for optimizing website performance. GTmetrix can help identify potential problems with a website's speed and performance.

Pingdom

Best for continuous performance monitoring

Pingdom is a cost-effective and reliable website uptime and performance monitoring tool.

Pingdom offers a wide range of features to help you monitor your website's uptime and performance. Pingdom is easy to use and can be customized to fit your specific needs.

WebPageTest

Best for a comprehensive performance test

WebPageTest is a free, open source tool that tests website performance in real browsers. It is used by web developers and site owners to optimize their websites for speed, usability, and resilience. WebPageTest can test your site in multiple browsers, devices, and locations around the world.

Screaming Frog

Best for SEOs and agencies worldwide for technical SEO site audits

The Screaming Frog SEO Spider is a desktop program that allows you to crawl websites and collect data about them. It is used by SEOs and agencies worldwide for technical SEO site audits. The program is easy to use and provides a wealth of data about each website it crawls.

WAVE Web Accessibility Evaluation Tool

Best for web accessibility evaluation

WAVE is a suite of evaluation tools that helps authors make their web content more accessible to individuals with disabilities. WAVE can identify many accessibility and Web Content Accessibility Guideline (WCAG) errors. WAVE is a valuable tool for making sure your web content is accessible to all audiences.

Uptrends

Best for Website Monitoring and Web Performance Monitoring

Uptrends offers comprehensive website monitoring and web performance monitoring, helping you ensure your site is always up and running optimally. Uptrends' features include uptime monitoring, response time monitoring, web page speed monitoring, and more.
